1. Welcome

This is the cover page and authoritative navigation guide for the VirtCruise documentation suite. Start with your audience in section 4 or a task keyword in section 11. Use the recommended reading path; then follow links to the owning document rather than relying on summaries here.

Important: Workstream acceptance and document publication state are different. DOC-001–DOC-010 are accepted programme baselines, while their current file metadata remains Draft or Draft — Internal Review. Distribution and operational use must follow DOC-001 review, approval, classification, and publication controls.

This index does not rewrite or replace any existing document. If an index summary and an owning document differ, stop, use the owning document/current approved policy, and report the index inconsistency to the Documentation Lead.

2. Purpose of the documentation suite

The suite enables a reader to:

- understand how documentation is governed;
- complete customer journeys safely;
- operate business, Finance, Support, content, and production workflows;
- use one authoritative lifecycle vocabulary;
- become productive through role Quick Starts;
- learn, practise, assess, and certify competence; and
- assume controlled production ownership and recovery responsibility.

The suite separates four kinds of authority:

Authority · Owning source · What it controls

Documentation governance · DOC-001 · Structure, style, review, publication, audiences, lifecycle

Business/customer procedure · DOC-002–DOC-006 · Role-specific tasks, controls, communication, escalation

Status/transition semantics · DOC-007 · Canonical states, legal transitions, terminality, visibility

Enablement and operations · DOC-008–DOC-010 · Desk reference, training/certification, production ownership/recovery

3. Documentation philosophy

1. **One owner per truth.** Link to an authoritative definition or procedure; do not duplicate it.

2. **Reader outcomes first.** Organise information around safe tasks and decisions.
3. **Evidence before assertion.** Separate accepted, planned, conditional, policy-owned, and unsupported behavior.
4. **Authoritative state before projection.** DOC-007 controls lifecycle terminology; emails, queues, badges, and summaries do not replace owning records.
5. **Least privilege and minimum data.** A document never grants application access or business authority.
6. **Exceptions are first-class.** State when to stop, what not to do, who owns recovery, and what evidence to preserve.
7. **Markdown is canonical.** PDF is a controlled portable format; source changes follow DOC-001 lifecycle.
8. **No fabricated evidence.** Screenshot placeholders remain placeholders until controlled capture.
9. **Immutable history.** Do not silently edit released material; review, version, supersede, archive, or retire it under governance.

4. Audience guide

Read the **Start** document first, then the sequence in **Continue**. “As needed” documents support specialist tasks.

Audience · Start · Continue · As needed / reason

Customer · [DOC-002 Customer User Guide](#) · [DOC-008 Customer Quick Start](#) · DOC-007 customer-visible statuses for clarification

Consultant · [DOC-008 Consultant Quick Start](#) · DOC-003 → DOC-005 Support → DOC-007 → DOC-009 · Role boundaries, customer communication, lifecycle, training

Finance · [DOC-004 Finance SOP](#) · DOC-003 → DOC-007 → DOC-008 Finance → DOC-009 · Operational coordination, status law, desk guide, certification

Support · [DOC-006 Support Playbook](#) · DOC-002 → DOC-003 → DOC-007 → DOC-008 Support → DOC-009 · Customer view, escalation, lifecycle, quick work, training

Content Editor · [DOC-005 Content Studio Guide](#) · DOC-007 → DOC-008 Content Editor → DOC-009 · Publication states, desk guide, training

Operations · [DOC-003 Operations Manual](#) · DOC-004 → DOC-006 → DOC-007 → DOC-008 Operations → DOC-010 · Finance/Support coordination, lifecycle, daily work, production

Administrator · [DOC-008 Administrator Quick Start](#) · DOC-003 role matrix → DOC-007 → DOC-009 → DOC-010 as authorised · Access boundary, lifecycle, assessment, production operations

Trainer · [DOC-009 Training Manual](#) · DOC-008 → relevant DOC-002–DOC-006 → DOC-007 · Teach role workflow from owning source; assess safely

Management · [DOC-001 Documentation Architecture](#) · DOC-003 → DOC-004 → DOC-006 → DOC-009 → DOC-010 · Governance, operational/financial/support risk, competence, handover

DevOps · [DOC-010 Production Handover](#) · DOC-003 → DOC-004 → DOC-005 Support where customer impact applies → DOC-007 · Production ownership with business/lifecycle context; not a developer guide

The detailed [Documentation Map](#) expands audiences by tasks and “do not use for” boundaries.

5. Document relationships

Programme dependency spine

Figure 1 — Governed dependency spine and principal cross-references. The vertical sequence shows programme construction, not a requirement that every reader read every document. Role documents cross-reference later authority where accepted.

Relationship rules

- DOC-001 governs every document's form, lifecycle, classification, ownership, review, and publication.
- DOC-002 describes the customer-facing journey.
- DOC-003 coordinates Back Office operations and exceptions.
- DOC-004 owns Finance procedures and controls.
- DOC-005 owns content preparation/publication procedure.
- DOC-006 owns Support communication and escalation.
- DOC-007 owns status and transition meaning across all roles.
- DOC-008 condenses first-hour tasks but never replaces manuals.
- DOC-009 trains and assesses application of existing sources.
- DOC-010 owns production handover/operation/recovery and references business manuals for impact.

6. Reading paths

Customer

DOC-002 Customer User Guide → DOC-008 Customer Quick Start
→ DOC-007 customer-visible status section when status meaning is needed

Finance

DOC-004 Finance SOP → DOC-003 Operations Manual → DOC-007 Status Reference
→ DOC-008 Finance Quick Start → DOC-009 Finance training/certification

Support

DOC-006 Support Playbook → DOC-002 Customer Guide → DOC-003 escalation
→ DOC-007 Status Reference → DOC-008 Support Quick Start → DOC-009

Content Editor

DOC-005 Content Studio Guide → DOC-007 publication lifecycle
→ DOC-008 Content Editor Quick Start → DOC-009 Content module

Operations

DOC-003 Operations Manual → DOC-004 Finance → DOC-006 Support
→ DOC-007 Status Reference → DOC-008 Operations Quick Start
→ DOC-009 Training → DOC-010 Production Handover (authorised production roles)

Administrator

DOC-008 Administrator Quick Start → DOC-003 Role Matrix
→ DOC-007 authority boundaries → DOC-009 Administrator assessment
→ DOC-010 production scope when separately authorised

Trainer and supervisor

DOC-009 Training Manual → exercises → assessments → certification
→ DOC-008 role guide → applicable DOC-002-DOC-006 manual → DOC-007

Management and Platform/DevOps

Management: DOC-001 → DOC-003/004/006 → DOC-009 → DOC-010
Platform/DevOps: DOC-010 → runbook/checklists/DR → DOC-003/004/006/007 context

There are eight principal reading paths: Customer, Consultant/Support (separated in the audience map), Finance, Content Editor, Operations, Administrator, Trainer/Supervisor, and Management/Platform. The [Documentation Map](#) provides ten explicit audience paths.

7. Document catalogue

Page values are actual PDF pages where a primary PDF exists. DOC-001 is estimated from its eight governed Markdown sources. DOC-008 includes its index and seven two-page role PDFs. DOC-009 and DOC-010 combine actual primary PDF pages with estimated companion pages at approximately 500 words/page.

Document · Title · Purpose · Audience · Est./actual pages · Version · Owner · Dependencies · Related documents

DOC-001 · [Documentation Architecture](#) · Govern structure, writing, screenshots, audiences, review, publication, and lifecycle · Authors, reviewers, approvers, publishers, managers · ~15 suite pages · 0.8.0-draft.1 · Documentation Lead · Accepted programme scope · All documents

DOC-002 · [Customer User Guide](#) · Guide customers through account, packages, quotes, bookings, Finance, receipts, support · Customers, Support, Consultants · 46 actual · 0.8.0-draft.1 · Documentation Lead · DOC-001, accepted customer behavior · DOC-006, DOC-007, DOC-008

DOC-003 · [Back Office Operations Manual](#) · Coordinate daily Operations, review cases, exceptions, incidents, and handover · Operations, Finance, Support supervisors, Administrators · 48 actual · 0.8.0-draft.1 · Operations Lead · DOC-001, DOC-002, v0.7.0 · DOC-004, DOC-006, DOC-007, DOC-010

DOC-004 · [Finance Standard Operating Procedures](#) · Define Finance segregation, verification, decisions, reconciliation, controls · Finance, supervisors, assurance, Operations · 42 actual · 0.8.0-draft.1 · Finance Manager · DOC-001–DOC-003, financial evidence · DOC-007, DOC-008, DOC-009, DOC-010

DOC-005 · [Content Studio User Guide](#) · Define accepted/planned package content, version, review, publication workflows · Content Editors, Approvers, Marketing, Accessibility · 36 actual · 0.8.0-draft.1 · Content Manager · DOC-001, accepted content contracts · DOC-007, DOC-008, DOC-009

DOC-006 · [Customer Support Playbook](#) · Standardise verification, customer communication, issue handling, escalation · Support, Consultants, supervisors, Operations · 34 actual · 0.8.0-draft.1 · Customer Support Lead · DOC-001–DOC-004, DOC-002 customer view · DOC-007, DOC-008, DOC-009, DOC-010

DOC-007 · [Status & Lifecycle Reference](#) · Own lifecycle names, visibility, transition legality, terminality, meanings · All roles, Product, Engineering/Operations · 11 actual · 0.8.0-draft.1 · Documentation Lead · DOC-001–DOC-006, accepted evidence · DOC-008–DOC-010

DOC-008 · [Quick Start Guide Pack](#) · Provide seven first-hour role desk references · Customers and all staff roles · 16 actual across 8 PDFs · 0.8.0-draft.1 · Documentation Lead · DOC-001–DOC-007 · DOC-009, owning manuals

DOC-009 · [Training Manual](#) · Define onboarding, role transition, refreshers, assessment, certification · Staff, trainers, supervisors, managers · ~27; manual 10 actual · 0.8.0-draft.1 · Learning and Development Lead · DOC-001–DOC-008 · Exercises, assessments, certification

DOC-010 · [Production Handover Guide](#) · Transfer safe production operation, maintenance, incident, backup, restore, DR ownership · Operations, DevOps, System Administrators, Platform/Support/Technical leads · ~24; guide 11 actual · 0.8.0-draft.1 · Platform Owner · DOC-001–DOC-009, production evidence · Checklists, runbook, DR guide

Appendix A catalogues all 40 governed source documents. PDFs are controlled alternate formats listed in Appendix B.

8. Version matrix

“Current Version” and “Status” are copied from document metadata. “Next Review” applies the DOC-001 maximum cadence from the last review: six months for high-risk Finance/production sources, twelve months elsewhere. Material change triggers an earlier review.

Document · Current Version · Status · Owner · Last Review · Next Review

DOC-001 · 0.8.0-draft.1 · Draft · Documentation Lead · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-002 · 0.8.0-draft.1 · Draft · Documentation Lead · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-003 · 0.8.0-draft.1 · Draft — Internal Review · Operations Lead · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-004 · 0.8.0-draft.1 · Draft — Internal Review · Finance Manager · 2026-08-03 · 2027-02-03 or earlier trigger

DOC-005 · 0.8.0-draft.1 · Draft — Internal Review · Content Manager · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-006 · 0.8.0-draft.1 · Draft — Internal Review · Customer Support Lead · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-007 · 0.8.0-draft.1 · Draft · Documentation Lead · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-008 · 0.8.0-draft.1 · Draft · Documentation Lead · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-009 · 0.8.0-draft.1 · Draft · Learning and Development Lead · 2026-08-03 · 2027-08-03 or earlier trigger

DOC-010 · 0.8.0-draft.1 · Draft · Platform Owner · 2026-08-03 · 2027-02-03 or earlier trigger

This matrix is navigation metadata, not an approval record. See each document and DOC-001 Versioning and Review.

9. Document ownership

Role · Accountability

Author · Creates accurate, traceable, audience-appropriate content; performs self-review; resolves findings; does not invent unsupported facts

Reviewer · Checks subject accuracy, usability, terminology, security/privacy, links, evidence, and scope; labels findings/blockers

Approver · Accepts business risk, scope, and readiness for the named lifecycle stage; records approval or rejection

Business Owner · Owns business intent, policy alignment, risk acceptance, funding/priority, and final business readiness

Technical Owner · Confirms architecture/runtime/operational accuracy and feasibility without overriding business/policy ownership

Document Owner · Maintains currency, review cadence, inbound/outbound links, supersession, archive/retirement, and change triggers

Publisher · Verifies fixed approved version, classification/recipients, package/links/privacy, publication record, and immutable release

One person may hold several roles only where segregation permits. An author must not be the sole approver of a customer release. Finance, production, security/privacy, and certification documents require proportionate specialist review.

10. Review schedule

Lifecycle

State · Meaning · Normal next state

Draft · Being authored; incomplete or unapproved · Internal Review

Review · Fixed candidate under internal and, where required, customer review · Approved or back to Draft

Approved · Required approvers accepted; not yet necessarily published · Released

Released · Immutable current published source for authorised audience · Archived or Retired through decision

Archived · Superseded historical version retained and clearly not current · Retention/disposal under policy

Retired · Withdrawn from current use with replacement/reason recorded · Remains controlled historical record

DOC-001 formally names Internal Review, optional Customer Review, Approved, Released, and Archive; "Review" and "Archived" above are navigation groupings. "Retired" is the governed withdrawal decision, not silent deletion.

Cadence and triggers

- Finance and production/high-risk procedure: review at least every six months.

- Other released documents: review at least every twelve months.

- Review earlier after product, navigation, role, contract, policy, legal/regulatory, vendor, architecture, security/privacy, incident, audit, customer/support insight, or linked-authority change.

- Record No change required with evidence; it does not indefinitely extend mandatory review.

- Update this master index whenever a document ID/title/path/status/version/owner/dependency/replacement changes.

11. Cross-reference index

Keyword · Start here · Then read

Account / login / password reset · DOC-002 · DOC-006 Support; DOC-009 security/training

Administrator / permissions / least privilege · DOC-003 role matrix · DOC-008 Administrator; DOC-009; DOC-010 security

Architecture · DOC-010 architecture summary for production · DOC-001 for documentation; accepted architecture evidence linked from DOC-010

Backup · DOC-010 Production Checklists · Disaster Recovery Guide; Operations Runbook RB-04/RB-05

Bank transfer / proof · DOC-004 Finance SOP · DOC-003; DOC-007 review/proof lifecycle

Booking / Booking Confirmation · DOC-002 customer view · DOC-003 operations; DOC-007 booking lifecycle

Certificates / TLS · DOC-010 Production Handover · DR certificate scenario; Operations Runbook RB-11

Change management · DOC-010 · Production Checklists / Runbook

ClamAV / malware scan · DOC-010 · DOC-003 proof handling; DOC-004; DR storage scenario

Communication / complaints · DOC-006 Support Playbook · DOC-009 communication/customer-service modules

Content Studio · DOC-005 Content Studio Guide · DOC-008 Content Editor; DOC-009

Customer Portal · DOC-002 · DOC-006 Support; DOC-003 operational boundary

Deployment / release · DOC-010 · Production Checklists; Operations Runbook RB-01

Disaster recovery / restore · DOC-010 DR Guide · Production Checklists; Runbook RB-05

DNS / NGINX · DOC-010 · Operations Runbook RB-11/RB-01

Finance / reconciliation · DOC-004 · DOC-003; DOC-007; DOC-008 Finance

Glossary / terminology · DOC-007 Status Glossary · Role manual glossary for procedure context

Incident response / outage · DOC-010 for production · DOC-003 operations; DOC-006 customer communication

Ledger / allocation / Receipt · DOC-004 · DOC-007 payment/receipt; DOC-002 customer view

Logging / monitoring / health · DOC-010 · Operations Runbook RB-03/RB-08/RB-09

Manual Finance · DOC-004 · DOC-002 customer guidance; DOC-007; DOC-010 production mode

Notifications / outbox / SMTP · DOC-007 lifecycle · DOC-003/DOC-004 operations; DOC-010 RB-06

Package / pricing / media / SEO · DOC-005 · DOC-007 publication; DOC-008 Content Editor

PostgreSQL / database · DOC-010 · DR database scenario; Runbook RB-12/RB-05

Publication / versions / restore content · DOC-005 · DOC-007 content lifecycle

Quick Start · DOC-008 Index · Owning detailed manual

Review case / approval / rejection · DOC-004 · DOC-003; DOC-007 transition matrix

Roles / escalation · DOC-003 role matrix · DOC-006 Support escalation; DOC-008 role guide

Security / privacy · Relevant role manual · DOC-009 common modules; DOC-010 production controls

Status / transition / terminal state · DOC-007 · Owning procedure for the action

Support · DOC-006 · DOC-002; DOC-003; DOC-007

Training / assessment / certification · DOC-009 · DOC-008 and applicable role manuals

12. Appendices

Appendix A — Complete governed source catalogue

Estimated pages use approximately 500 words/page when no PDF exists. Purpose, audience, dependencies, and related documents are concise navigation descriptions; the linked source remains authoritative.

Document · Title/link · Purpose · Audience · Pages · Version/status · Owner · Dependencies · Related

DOC-001 · [Documentation Architecture](#) · Govern suite · Documentation roles/management · ~3 · 0.8.0-draft.1 / Draft · Documentation Lead · Programme scope · All

DOC-001-AM · [Audience Map](#) · Map audiences/access · Authors/publishers · ~2 · 0.8.0-draft.1 / Draft · Documentation Lead · DOC-001 · DOC-008/011

DOC-001-DS · [Document Standards](#) · Define mandatory format · Authors/reviewers · ~2 · 0.8.0-draft.1 / Draft · Documentation Lead · DOC-001 · Templates/style

DOC-001-DT · [Document Templates](#) · Supply controlled templates · Authors · ~2 · 0.8.0-draft.1 / Draft · Documentation Lead · Standards · All authored docs

DOC-001-SS · [Screenshot Standards](#) · Govern safe captures · Authors/reviewers · ~2 · 0.8.0-draft.1 / Draft · Documentation Lead · Standards/privacy · All placeholders

DOC-001 governance currently has no programme PDF requirement. Markdown remains canonical for every entry.

Appendix C — Search and navigation rules

- Search by canonical term first: exact status in backticks, document ID, role, screen/control, business reference, or incident topic.
- Prefer the keyword index, then the catalogue, then the owning document's contents.
- Search DOC-007 before interpreting a lifecycle term and the owning manual before acting.
- Do not use README files, release evidence, acceptance records, or historic deployment examples as replacements for the governed programme documents.
- Report broken links, stale titles, duplicate definitions, or ownership conflicts to the Documentation Lead with the source/target paths.

Appendix D — Related governance
